Subject: Southern Forest Resource Assessment draft comments

Mr. John Greis

Dear Mr. John Greis,

I am writing to urge you to cease and desist such activity.

As a governmental organization, your analyses are fundamentally corrupted by political agendas. I have no stomach for another flawed government study, recommending more studies and greater government control.

Politically motivated analysis of ecological and socio-economic sustainability is outside the scope of government activity.

Enough is enough.

Confine your comments and analysis to directly owned government lands. Limit your study to current and proposed usage of such land. Extrapolate no further.

You WILL compromise your credibility if you fail to resist attempts to taint your study with junk science and political hatchets of the increasingly fascist "environmental movement".

Tread cautiously.

Sincerely,

tom luther
